SCP

 (history)  (feed)  (../search)

Note: We are working on updating our documentation, this page has been identified as still needing improvement. This notice will be removed once these improvements are complete.

SCP

SourceForge.net provides support for managing project web and developer web content, and uploading file releases using SCP through our File management service.

SCP (Secure copy) is part of the SSH protocol suite.

Clients

SCP clients include:

- scp, a command-line client included in OpenSSH, available on Mac OS X, Linux, and BSD natively; and on MS Windows through Cygwin.
- pscp, a command-line client included in PuTTY, available for MS Windows.
- WinSCP, a graphical client available for MS Windows.

Examples are provided for scp:

For managing file releases

FRS Hostname: frs.sourceforge.net

Path: /home/frs/project/P/PR/PROJECT_UNIX_NAME/ - Substitute your project UNIX name data for /P/PR/PROJECT_UNIX_NAME
